

Company Name: Kuwait Packing Material Mfg. Co.
Industry: Packing Industry (Production - Discrete)
Head Office: Kuwait
Locations: 2 in Kuwait and 2 in Saudi Arabia
Connectivity: Online Using VPN
Implementation Duration: 6 months
No. of implementor: Two
Modules Implemented: General Ledger, Inventory & Warehousing, Production with MRP1, HR and Payroll

Critical Requirements

The major areas that were addressed during the RT implementation were: Production planning and linking of entire Sales Orders to Production plan, Purchase plan and deliveries. Also we have given solutions for their entire Payroll and HR requirements. By deploying these solutions, the customer has achieved: (a) Better Monitoring of Sales Orders with stock analysis and user rights controls. (b) Better Management of Inventories. (c) A complete Production planning w.r.t. Orders, availability of stocks, machine capacity and availability. (d) Improvements on the Purchase planning (cycle). (e) A Complete HR system covering Payroll, personnel, Salary Bank transfer, Vacation and Indemnity Calculations etc. (f) Connectivity with their Saudi Offices (g) Waste Management at every Production process.

How it was Achieved

a) Re-work for the the entire work flow (Business process) in SSAD (Structured System Analysis and Design) document (b) Establishing a sound network for both LAN and WAN (c) defining of the Sales process (d) defining of the Production Process. (e) defining of the cost controls, credit controls, budgeting, etc.. All the modules are ready available in Focus, like, Sales Order Management, Production Planner, Multi Process BOM, Inventory control and configuring the accounts in the Inventory masters, Customer Credit Control, Budgetting. We have also used Import Rate External Module to Import Product Selling and Purchase rates (Customer and Supplier wise). Payroll and HR Module, as implemented in Pan Arab, KEMS and other cusomters in Kuwait.

About K-PAK

(About should include turnover, no. of employees, Year of establishment, Other divisions etc. Please visit the following link for details of K-Pak
http://www.ameinfo.com/financial_markets/Kuwait/Company_KW0176/

Kuwait Packing Materials Manufacturing was established in 1993 as a manufacturer of polystyrene foam products for the food industry. K-Pak is a renowned name in the Packing Industry. They have a big Manufacturing Facility in the Sabhan Industrial Area in Kuwait. They have a total of 300 Staff and are listed in the Kuwait Stock Exchange. The Production Units were designed by the German Engineers where the complete process of plastic material manufacturing can be done in one go. The Manufacturing process starts from usnig of Granuels and converting the same to Rolls of Various Sizes. Once the Rolls are manufactured, they are stored in a seperate storage area. These Rolls are of various colours, sizes and density and they can also be sold directly in the market, though it is primarily an Intermediate Product. The rolls are then taken to various machines which makes different products out of these Rolls, like Plates, Cups, Boxes, Bags, etc. The Machine plates are pre-configurd with the design of the products. The Plates are also manufactured in a seperate facility owned by K-pak. Onces the Goods are manufactured, they packed in different packing sizes, Cartons, Bags etc. If they are required to go for some special printing (Eg: McDonalds Boxes), they will be sent to the printing area. Then the prodcuts are dispatched from the Delivery area. K-pak has a market covering Kuwait, Saudi Arabia, Jordan, UAE, South African countries, Far East Countries. They have production units and marketing offices in Jeddah and Dammam. Their expansion plans covers production units and market offices in South Africa, UAE, Jordan.
