- Established: 2006
- Number of Employees: 60
- No. of Locations: 2

Type of Business:

Manufacture of Aluminium and Steel Slats for Roller Shutters

Software's used:

1. Accounting Software
2. Sales Module
3. Inventory and Order Management
4. Production Module
5. Payroll Module

Currently working on 'Focus RT' (ERP Solution).

Critical Business Requirements and Challenges:

1. Security on cash/bank balance and sales and purchase information
2. Order Management and with Inventory tracking
3. Generation of Invoices and Financial Updates
4. Periodic and online reporting on financial status

Business Solutions:

Focus Softnet offered its ERP solution called "FOCUS RT, an ERP software solution that has the capability to run from remote locations on a centralized database

The ERP software solution has been implemented with capabilities to keep proper inventory tracking and financial account postings, resulting in valid reports.

Security Settings on Focus RT has been set to such level wherein users are limited to information required only to their domain/ activity.

The Management of ALUSOL now uses internet connectivity to login directly into Focus to check the reports in REAL TIME!!
