

# What Makes *Adaptus RT* the right *ERP* Solution For you?

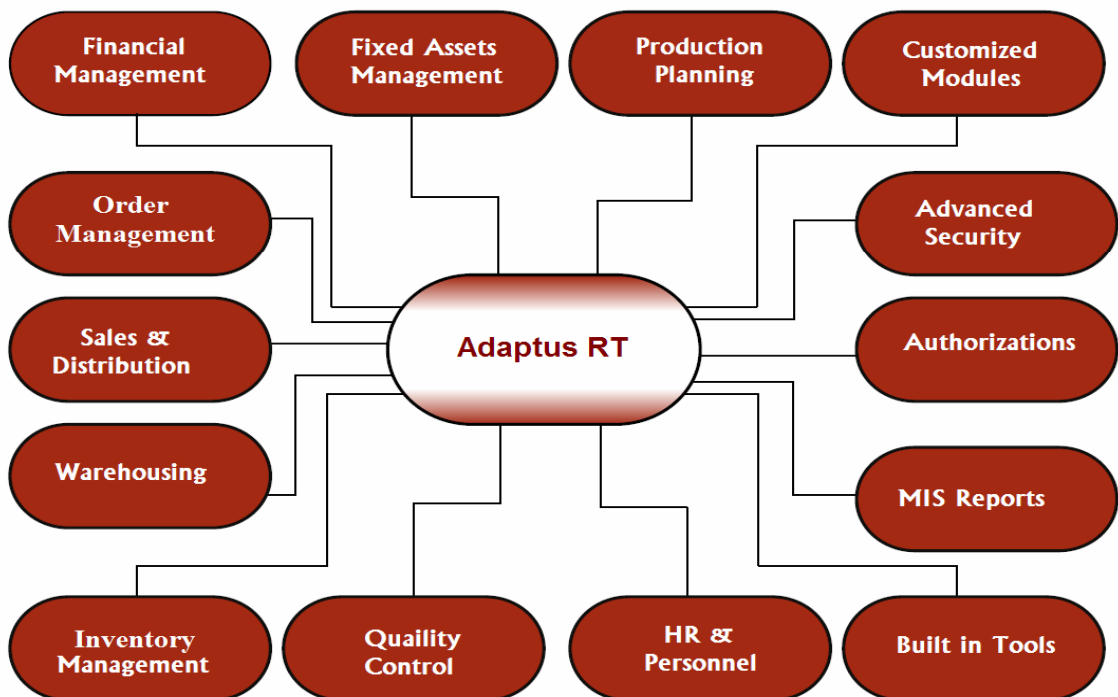

With  
**Adaptus RT**  
find the Right  
ERP module  
for your  
Business  
Needs

To be successful in today's competitive business climate, you need more than just managerial vision and excellent staff. You need to manage information, for which a superior software system is a critical asset. **Adaptus RT** has been designed to keep you in control. It distinguishes itself from the many software solutions in the market by functioning as the digital nervous system of your entire organization.

**Adaptus RT** is an Enterprise Resource Planning package that seamlessly integrates all facets of the business, including Accounting, Inventory Management, Order Management, Production, Warehousing, Sales and Distribution. Utilizing a modular design, **Adaptus RT** flawlessly combines the functionalities of the entire business. With **Adaptus RT**, you get detailed information of your Materials, Production, Sales and Finances. All while providing you more time to service your customers.

## Seamlessly integrated

Solutions that **MOVE** business

## Powerful Features

Your processes and systems are unique, so why get an application which demands that you change your systems? **Adaptus RT** can adapt and stretch to meet all your needs, and can be customized to an incredible extent.

### Customizable Interface

**Adaptus RT** provides for your data-entry screens to be customized to suit your specific requirements with ease and flexibility. Postings of the values computed in each field can be easily updated to any account as required. Conditions also can be imposed on each column using mathematical formula. Additional screens can be added should the need arise.

### Flexible Reporting

Included is an extensive set of pre-built reports. You can also create customized reports that give you the vital information you need. All reports can be represented either by figures and tables or by graphs. All reports / outputs can be exported to PDF / MS EXCEL / HTML formats.

### 3<sup>rd</sup> Party Integrations

**Adaptus RT** is fully ODBC compliant. Not only can the data be imported and exported in XML format, but the data can be dynamically exchanged with other external modules developed specifically for your business using the ActiveX controls provided. In addition, using **Adaptus RT** API's, we can integrate with your existing applications.

### Cross Share Data...Link Documents

Linking documents together enables you to relate the entries in one document with another for more effective reporting. For example, Sales orders are linked to Sales Invoices, Material Receipt Notes to Purchase Vouchers and so on..

### Authorizations

**Adaptus RT** has an authorization module. For many businesses this is an important requirement. Authorizations can be assigned by user for a wide variety of criteria, such as, quantity or dollar threshold.

### Multiple Currencies

**Adaptus RT** supports transactions in multiple currencies with user-definable exchange rates. Reports can be generated in all currencies.

## 6 Unique Benefits

### 1. Modular

**Adaptus RT** solution is basically an end-to-end business solution but can be deployed as modular solutions; and it is scalable to add more modules and features as your business grows.

### 4. High Return on Investment

We believe in a value-driven approach to business, therefore our solutions are reasonably priced, and we provide you a fast ROI.

### 2. Faster Access to data

When installed on a network, you can update and access information in real time. Your employees don't have to wait for hours to retrieve data, irrespective of its size. Everything happens at the press of a button.

### 5. Scalable

Whether you grow by 10% or 500% **Adaptus RT** is immediately and easily scalable, and provides the same functionality of speed, customization and flexibility at all levels.

### 3. Training & Support

Getting everyone familiar with the applications as well as identifying problem areas before they become critical are the key factors in implementing an ERP solution. We will provide comprehensive Training & Support to your employees to help them become productive quickly.

### 6. Functional Expertise

Our team of experts are intimately familiar with various industries, have decades of cumulative experience, and are driven to provide insight for your business processes.
